

DECLARATION OF CATALONIA ACTION

Between July 2n and 8th will take place in Quebec the yearly session of the UNESCO World Heritage Committee. The French project to include military fortresses at Mont-Louis and Villefranche-de-Conflent will be voted. Military fortifications by Sebastien Le Preste de Vauban (1633-1707) in Northern Catalonia represent French conquest and military occupation.

IN FRONT OF THIS NEW VILE AND HUMILIATING ATTACK AGAINST OUR COUNTRY, CATALONIA ACTION DECLARES:

FIRST: to include Vauban's work as World Heritage is making you accomplice of France in their try of genocide against Catalonia since 1659, the year of Northern Catalan counties annexation to the French Empire.

This candidature has allowed French paranoid nationalism to strengthen by promoting a false image of champion nation in everything that relates to Human Rights but in reality is the totalitarian politics that characterize France in those colonized territories under her administration and apply today blatantly and unpunished.

Between April 28th and May 16th 2008 in Geneva, United Nations Economic Scientific and Cultural Organization Committee affirmed:

- The absence of official recognisance of the minorities within French territory.
- The absence of official recognisance of minority languages that has contributed to a constant decline in the number of speaker of those languages.
- The absence of guarantee of the economical, social and cultural rights of the people who belong to minority groups.

The Committee reiterated again the French government that they must ratify:

- European Council convention for the protection of national minorities.
- European Charter for minority languages.
- European Convention Protocol number 12 for the protection against all forms of discrimination.

SECOND: Vauban's case in another expression of our colonial condition and the demonstration that the independence of Catalonia is the only possible way to guarantee our survival as a nation. Our north is to break with Spain and France. Why?

- Because due to our national dignity and respect for our rights cannot glorify who were our ancestors' executioners nor elevate to "humanists" real criminals.
- Because we have valuable heritage that we want to show the world without foreign interferences.

- Because as an millennial European Nation, 13 million strong, we have to be able to explain our true History and stop being victims of "historicides" as it is this French government farce that will be voted in Quebec.

Catalonia, despite the hatred of the colonizers and the treacheries of the collaborators, still has the courage and determination to achieve her independence. The way has already begun and victory will be ours. Then, our country will be part of the free nations in the world, and like the others, will be able to point and judge, if necessary, those who have negated our people their legitimate right of existence as a nation.

Barcelona - Perpinyà, July 1st, 2008
